Curriculum for Approved OGME -1 Training Year
Effective July 1, 2013

Traditional Rotating Internship
- Minimum of 6 months training in any or all basic core disciplines
  - general internal medicine
  - general surgery
  - family practice
  - pediatrics
  - obstetrics/gynecology (ambulatory gynecology)
  - emergency medicine
- At least 2 months general internal medicine
- At least 1 month emergency medicine
- At least 1 month family practice OR ½ day per week (for a minimum for 46 weeks) of ambulatory exposure in a family medicine continuity of care type practice site
- No more than 3 months of elective exposure (to be approved by DME/internship program director)
- No more than 1 month may be spend in non-clinical experience (research, etc)
- Exposure must occur to the support disciplines of pathology, radiology, and anesthesiology. This may occur directly by rotation or indirectly by formal didactic conferences and/or exposure while on medical and surgical services. This exposure must be verified on intern logs.
- All remaining time may be scheduled at the discretion of the base institution.

Anesthesiology -1st Year Requirement
- 1 month of family practice (preferable in an ambulatory setting)
- 3 months of general internal medicine
- 3 months of surgery, one of which is general surgery. (plastics, orthopedic and urologic)
- 1 month of pediatrics (inpatient or ambulatory) if available, or one additional month of anesthesia
- 1 month of obstetrics and gynecology, if available, or female reproductive medicine
- 3 months of anesthesia

Dermatology - See Traditional Rotating Internship
Diagnostic Radiology - 1st Year Requirement

- 1 month of emergency medicine
- 1 month of family practice
- 2 months of surgery
  - 1 month of general
  - 1 month of orthopedic
- 2 months of internal medicine
  - 1 month of general
  - 1 month of intensive care unit
- 1 month of pediatrics
- 1 month of obstetrics/gynecology
- 1 month of elective
- 3 months diagnostic radiology

Emergency Medicine - 1st Year Requirement

- 1 month (or 4 weeks) of general internal medicine
- 2 months (or 8 weeks) of additional medicine that may include training in general internal medicine, medical subspecialties, or hospital family practice in any combination.
- 1 month (or 4 weeks) of hospital-based general surgery
- 2 months (or 8 weeks) of additional surgical training in either ambulatory or hospital settings. These eight (8) weeks may consist of:
  - General surgery.
  - Any surgical subspecialty.
  - Free-standing ambulatory surgery, on or off campus.
  - Gynecological surgery.
  - Emergency medicine.
- 1 month (or 4 weeks) of training in female reproductive medicine with a minimum of 50% of this time spent in obstetrics
- 1 month (or 4 weeks) of pediatrics with a minimum of 50% of ambulatory training which will be defined by the training institution. Strong consideration should be given to a pediatric emergency medicine rotation
- Four months (or 20 weeks) of emergency medicine that will be conducted under the supervision of a board certified/board eligible emergency medicine physician in an institution approved for residency training in emergency medicine.
Family Medicine and Emergency Medicine - 1st Year Requirement
- Please refer to ‘Family Medicine and OMT’ rotation requirements.

Family Medicine Integrated NMM - 1st Year Requirement
- Please refer to ‘Family Medicine and OMT’ rotation requirements.

Family Medicine and OMT - 1st Year Requirement
- 8 weeks general internal medicine
- 4 weeks women’s health
- 4 weeks pediatrics and adolescent medicine
- 4 weeks general surgery
- 4 weeks emergency medicine
- 4 weeks electives
- ½ day per week family practice ambulatory clinic
- 24 weeks program/hospital requirements
- 150 patient visits continuity of care site experience

Internal Medicine - 1st Year Requirement
- 4 months or sixteen (16) weeks of general internal medicine
- 1 month or four (4) weeks of critical care (ICU/CCU), or ongoing supervised exposure to critical care throughout the training program;
- 1 month or four (4) weeks of cardiology;
- 1 month or four (4) weeks of care of the surgical patient to be selected from one of the following: general surgery; perioperative medicine; surgical ICU
- 1 month or four (4) weeks of emergency medicine;
- 1 month or four (4) weeks of women’s health, at least half of which must be ambulatory gynecology
- 3 months of selectives that are chosen by the program director. Each of the selectives can be only for one month, except additional general medicine which may be for two more months. Acceptable selectives are as follows:
  - any internal medicine subspecialty
  - additional general internal medicine,
  - ICU
  - Geriatrics
  - palliative medicine
  - radiology
  - anesthesia
  - neurology
  - psychiatry
  - osteopathic manipulative medicine
  - dermatology
  - pediatrics
  - family medicine
  - nonmedical surgical ambulatory specialty such as orthopedics, ENT, urology or ophthalmology
NOTE: Internal medicine block nights can be used as one of these three months, but only if the rotation includes a minimum of five hours of structured education per week, to include, morning report or medicine lectures, and one book or journal club per month.

- Continuity ambulatory experience must exist a minimum of half a day per week for a minimum of thirty-six (36) weeks in internal medicine under the supervision of an onsite internist.

**Internal Medicine/Emergency Medicine - 1st Year Requirement**
- 4 months or 16 weeks of emergency medicine
- 3 months or 12 weeks general internal medicine; 2 months hospital based, 1 month ambulatory based
- 1 month or 4 weeks hospital-based cardiology
- 1 month or 4 weeks adult critical care (ICU/CCU)
- 1 month or 4 weeks of care of the surgical patient; requirement filled with: general surgery, perioperative surgery or surgical ICU.

**Internal Medicine/Pediatrics - 1st Year Requirement**
- 3 months of general internal medicine
  - 2 months must be hospital-based.
  - 1 month must be ambulatory
- 1 month of critical care of the adult patient (CCU/ICU)
- 1 month of either cardiology or pulmonary medicine; must be hospital-based
- 3 months of general pediatrics
  - 2 months must be hospital-based.
  - 1 month must be ambulatory
- 1 month of newborn nursery
- 1 month of pediatric critical care (NICU/PICU)
- 1 month of general surgery of the adult and pediatric patient. A rotation specializing in perioperative care can satisfy this requirement and can be supervised either by a surgeon or an internist or pediatrician but only if the rotation is designed exclusively to provide perioperative co-management of surgical patients.
- 1 month of women’s health; half of which must be ambulatory gynecology

NOTE: When combined internal medicine/pediatric clinics are used to meet the internal medicine and pediatric block ambulatory requirements, only four (4) weeks or one (1) month of general ambulatory medicine is required. If the rotations are provided in four week blocks rather than one month blocks, then the remaining four (4) weeks may be in any pediatric or medicine subspecialty.
Neurology - 1st Year Requirement
- 2 months neurology
- 1 month emergency medicine
- 1 month surgery selective (vascular, neurosurgery, orthopedics, etc.)
- 1 month elective (as agreed upon with the residency training director)
- 7 months internal medicine to include:
  - 1 month cardiology
  - 1 month intensive care unit rotation
  - 3 months general internal medicine
  - 2 months elective internal medicine.

Neuromuscular Medicine and OMT - 1st Year Requirement
- 2 months of exposure in general internal medicine consisting of hospital and/or ambulatory experience
- 1 month in emergency medicine
- 1 month exposure in general surgery, which must include in-patient experience
- 1 month of family medicine; may also be met in one-half day per week for a minimum of 46 weeks in a family medicine continuity clinic
- 1 month of pediatrics
- 1 month of obstetrics and gynecology or ambulatory gynecology.
- 3 months of electives (1 month strongly recommended as OMM)
- 2 months at discretion of program.
- **NOTE:** No more than one month may be spent in non-clinical experience, (research, scholarly pursuits, administration, etc.).

Ob/Gyn - 1st Year Requirement
- 2 months general internal medicine
- 1 month critical care
- 1 month emergency medicine
- 1 month general surgery
- 2 months gynecologic surgery
- 1 month neonatology
- 3 months obstetrics (hospital based)
- 1 month of OB/GYN Ultrasound
- **NOTE:** Must spend one-half day per week throughout the four years of residency, when in obstetrics or gynecological surgery, in an obstetrical or gynecology clinic.
Ophthalmology - 1st Year Requirement

- 3 months internal medicine
- 2 months neurology/neurological surgery
- 1 month surgical subspecialty (ophthalmologic, neurological, maxillofacial, vascular, plastic, general)
- 1 month medical subspecialty (pulmonary, neurology, dermatology, gastroenterology, rheumatology, family medicine, internal medicine)
- 1 month radiology/neuroradiology
- 1 month emergency department/trauma
- 1 month intensive care unit
- 1 month ophthalmology
- 1 month elective (from surgical subspecialty or medical subspecialty lists above)

Orthopedic Surgery - 1st Year Requirement

- 2 months or rotations of internal medicine
- 1 month or rotation of emergency medicine
- 3 months or rotations of general orthopedic surgery
- 1 month or rotation of family medicine
- 2 months or rotations of non-orthopedic surgery or vascular, general trauma, basic wound/burn/plastics, urology
- 1 month or rotation of obstetrics or woman's health
- 2 months or rotations of electives upon approval of the program director which may include any of the following areas:
  - General orthopedic surgery
  - Foot and ankle
  - Hand
  - Hip and knee
  - Shoulder and elbow
  - Spine
  - Sports medicine
  - Pediatrics or pediatric orthopedics
  - Anesthesiology
  - Radiology
  - Pain management
  - Neurology
  - Neurosurgery
  - Physical medicine and rehabilitation
Otolaryngology/Facial Plastic Surgery - 1st Year Requirement

- 4 months hospital-based general surgery
- 1 month medical pediatrics
- 1 month anesthesia
- 1 month intensive care unit
- 1 month emergency room
- 1 month surgical subspecialty (ophthalmologic, neurological, vascular, maxillofacial, plastic, cardiovascular, general)
- 1 month medical subspecialty (pulmonary, neurology, family medicine, gastroenterology, dermatology, internal medicine)
- 2 months elective (from surgical subspecialty or medical subspecialty lists above)

Pathology
NA – approval based on exceptional circumstance of no program currently available

Pediatrics - 1st Year Requirement

- 1 month surgery
- 1 month internal medicine
- 1 month women’s health
- 1 month emergency medicine
- 2 months of ambulatory pediatrics
- 1 month of newborn nursery
- 2 months of general in-patient pediatrics
- 1 month of NICU
- 2 months additional training which will be spent in pediatric subspecialty areas
- Continuity of care clinic will be required and will be a priority extending throughout the year. It will occupy one-half day per week throughout the training program.

Physical Medicine and Rehabilitation - See Traditional Rotating Internship

Proctologic Surgery - See Traditional Rotating Internship

Psychiatry - 1st Year Requirement

- 4 months of general internal medicine
- 2 months of neurology
- 6 months of psychiatry
Public Health and Preventative Medicine - See Traditional Rotating Internship

Radiation Oncology - 1st Year Requirement

- 1 month of emergency medicine
- 1 month of family medicine
- 2 months of surgery
  - 1 month of general
  - 1 month of orthopedic
- 2 months of internal medicine
  - 1 month of general
  - 1 month of intensive care unit
- 1 month of pediatrics
- 1 month of obstetrics/gynecology
- 1 month of elective
- 1 month of diagnostic radiology
- 1 month of medical oncology
- 1 month of radiation oncology

Surgery – General, Neurological and Urological - 1st Year Requirement

- Rotations for ½ day for 46 weeks, in an out-patient clinic or office
- 2 months of general internal medicine
- 1 month of ICU
- 1 month of emergency medicine
- 1 month of female reproductive medicine
- 1 month of pediatrics, if available, or another primary care specialty at the discretion of the training institution
- 4 months of general surgery
- 2 months of electives to include any of the following areas:
  - Urology
  - Orthopedics
  - Anesthesia
  - ENT
  - General surgery
  - Vascular surgery
  - Neurosurgery
  - Cardiovascular thoracic surgery
  - Plastic and reconstructive surgery
  - Radiology
