OSTEOPATHIC MEDICAL PROFESSION REPORT

AMERICAN OSTEOPATHIC ASSOCIATION

TREATING OUR FAMILY AND YOURS

THE OSTEOPATHIC MEDICAL PROFESSION	2
Growth in Osteopathic Physicians	2-3
Growth in Osteopathic Medical Students	3-4
Growth in Colleges of Osteopathic Medicine Enrollment	4-5
Osteopathic Postdoctoral Training Institution & Program Enrollment	6
OSTEOPATHIC MEDICINE AND DIVERSITY	7
Women and the Osteopathic Medical Profession	7-8
Ethnicity of Osteopathic Medical Students	9-10
OSTEOPATHIC PHYSICIANS WITHIN THE U.S.	10
States with the Largest DO Population	10-11
DO Population within all 50 States	11-12
OSTEOPATHIC PHYSICIANS AND AMERICAN HEALTH CARE	13
Osteopathic Physician Office and Ambulatory Visits	13-14
Osteopathic Physician Payment	15
OSTEOPATHIC PHYSICIAN SPECIALTIES	16
DO Distribution among Medical Specialties	16
Osteopathic Board Certification	17
THE AGE OF THE OSTEOPATHIC MEDICAL PROFESSION	17
Age of Total Physician Population	17
Age of the DO Population	18
Age of the DO Population by Gender	18-19

THE OSTEOPATHIC MEDICAL PROFESSION

Developed more than 130 years ago by Andrew Taylor Still, MD, DO, osteopathic medicine brings a unique philosophy to traditional medicine. With an emphasis on the inter-relationship of the body's nerves, muscles, bones and organs, osteopathic medical school curriculum prepares osteopathic medical students to apply the philosophy of treating the whole person to prevent, diagnose and treat illness, disease and injury.

Osteopathic physicians (DOs) are fully-licensed to prescribe medicine and practice in all specialty areas including surgery. DOs are trained to consider the health of the whole person and use their hands to help diagnose and treat their patients.

As of May 31, 2010

Number of DOs: 70,480*

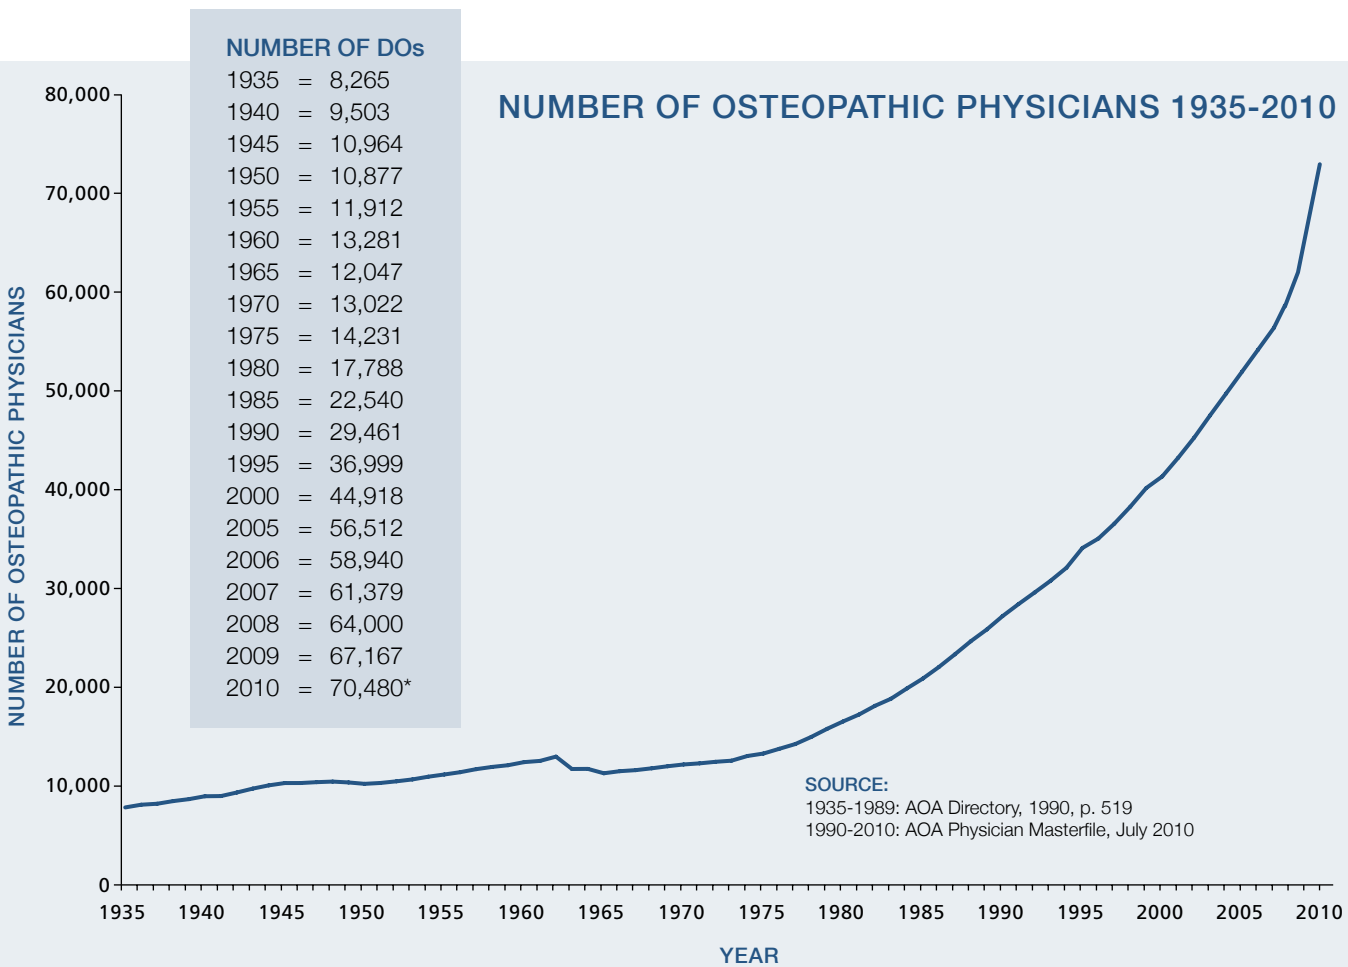

Number of AOA members: 41,640

Percent of DOs that are AOA members: 59.1%

Estimated number of DOs in active practice: 63,121*

GROWTH IN OSTEOPATHIC PHYSICIANS

DOs are one of the fastest growing segments of health care professionals in the United States. At the current rate of growth, it is estimated that more than 100,000 osteopathic physicians will be in active medical practice by the year 2020. The graph below shows the exponential growth in the number of DOs since 1935.

* These numbers do not include 2010 osteopathic medical school graduates.

DOs are one of only two types of fully-licensed physicians within the United States. MDs and DOs make up the entire U.S. physician population. Therefore, the growth of the osteopathic medical profession can also be illustrated by the increasing percentage of DOs within the entire U.S. physician population. The graph below illustrates this growth since 1980.

GROWTH IN OSTEOPATHIC MEDICAL STUDENTS

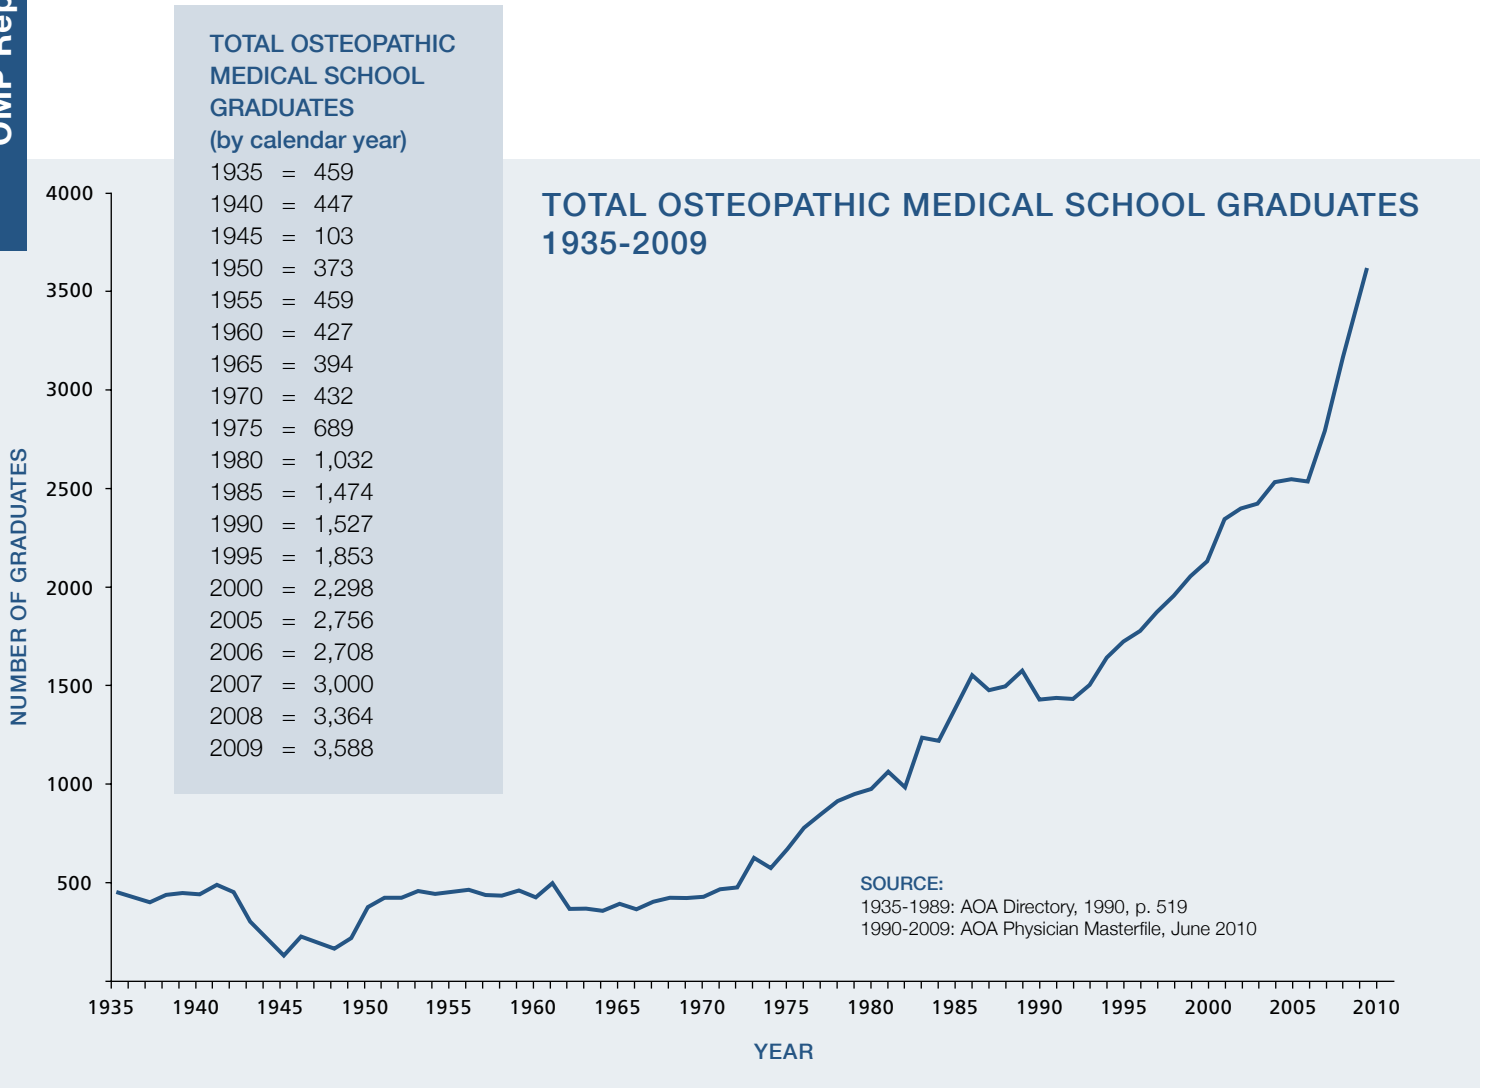

In addition to the DO population growth, the osteopathic medical student population is increasing. In fact, since the fall of 2003, six new osteopathic medical schools, three new branch campuses, and three new additional locations have opened. The table below illustrates the growth in osteopathic medical school students each academic year since 2005-06.

PERCENT INCREASE OF OSTEOPATHIC MEDICAL SCHOOL ENROLLMENT

	2005-06	2006-07	2007-08	2008-09	2009-10
Total enrollment	13,406	14,409	15,634	16,893	18,033
Change from prior year	↑6.4%	↑7.5%	↑8.5%	↑8.1%	↑6.7%

SOURCE: Website of the American Association of Colleges of Osteopathic Medicine (AACOM), www.aacom.org, accessed July 22, 2010. All osteopathic medical student statistics used with permission from AACOM.

The graph below illustrates the growth in osteopathic medical school graduates each calendar year since 1935.

GROWTH IN COLLEGES OF OSTEOPATHIC MEDICINE ENROLLMENT

For a more detailed look at the increase in osteopathic medical school students, the table on the next page reports the number of enrolled osteopathic medical school students for each osteopathic medical school or branch campus in the past five years, where applicable.

OSTEOPATHIC MEDICAL SCHOOL TOTAL ENROLLMENT BY ACADEMIC YEAR

College of Osteopathic Medicine

	Total Enrollment

OSTEOPATHIC POSTDOCTORAL TRAINING INSTITUTION & PROGRAM ENROLLMENT

The American Osteopathic Association (AOA) established the Osteopathic Postdoctoral Training Institution (OPTI) in 1995.

Each OPTI is a community-based training consortium comprised of at least one college of osteopathic medicine and one hospital. Other hospitals and ambulatory care facilities may also partner within an OPTI. Community-based health care facilities such as ambulatory care clinics, rehabilitation centers and surgicenters now have the resources and support necessary to provide physician training with an OPTI's assistance.

AS OF MAY 31, 2010

- Number of accredited OPTIs: 19
- Approved Internship Training Programs: 142
- Approved Internship Training Positions: 1,318
- Approved Residency Training Programs: 792
- Approved Residency Training Positions: 8,501

The following graph and table illustrate the growth in osteopathic physician enrollment in postdoctoral training programs for each academic year since 2004-05.

	2004-05	2005-06	2006-07	2007-08	2008-09
Total DOs in AOA Internship & Residency Programs	3,876	4,020	4,511	4,934	5,399
DOs in AOA Residency Programs	2,422	2,535	2,989	3,289	4,794
DOs in AOA Internships	1,454	1,485	1,525	1,645	605*

SOURCE: AOA Intern/Resident contracts received by AOA Department of Education and AOA's Trainee Information, Verification, and Registration Audit System for academic year shown.

* In July 2008, the AOA restructured the first postdoctoral year of training. As a result, most first year positions are now offered as residency positions; though internships are still required in certain specialties. Prior to 2008, all AOA first year postdoctoral training was classified as an internship.

OSTEOPATHIC MEDICINE AND DIVERSITY

WOMEN AND THE OSTEOPATHIC MEDICAL PROFESSION

While few career paths were open to women in the late 1800s, the first class to convene at the American School of Osteopathy in 1892-1893 included women. The number of female DOs increased until World War II. During the war, female enrollment sharply decreased. However, by the 1960s women were again a prominent number in osteopathic medical schools. Today, women account for over a third of all DOs and nearly half of the total enrollment in osteopathic medical schools.

PERCENT OF FEMALE OSTEOPATHIC MEDICAL STUDENTS AND DOs

	1980	1985	1990	1995	2000	2005	2010
DOs	5.6%	9.7%	13.9%	17.9%	22.8%	26.7%	32.0%
Osteopathic Medical Students	19.7%	27.2%	32.7%	36.3%	41.1%	49.6%	47.6%

PERCENT OF FEMALE OSTEOPATHIC MEDICAL STUDENTS AND DOs 1980-2010

Physicians: AOA Masterfile, June 2010

Students: Website of the American Association of Colleges of Osteopathic Medicine (AACOM), www.aacom.org, accessed July 22, 2010.

All osteopathic medical student statistics used with permission from AACOM.

The below table further illustrates the growing increase in female osteopathic medical school graduates over the last 20 years. Today, almost half of all DOs in active practice four years or less after graduation are female.

DOs IN ACTIVE PRACTICE BY NUMBER OF YEARS AFTER OSTEOPATHIC MEDICAL SCHOOL GRADUATION AS OF MAY 31, 2010

# Years after Graduation	Female	Male	Total	% Female
0-4	6,270	6,461	12,731	49.2
5-9	5,537	7,629	13,166	42.1
10-14	3,792	6,608	10,400	36.5
15-19	2,621	5,446	8,067	32.5
20-24	2,005	5,484	7,489	26.8
25-29	1,098	4,658	5,756	19.1
30+	517	4,994	5,511	9.4
Total	21,840	41,280	63,120	34.6

SOURCE: Physician AOA Masterfile, June 2010.

NOTE: Active practice includes all osteopathic physicians under the age of 65 who are not known to be inactive or retired.

While the percent of female enrollment in osteopathic medical schools has declined in recent years, the total number of female osteopathic medical students has steadily increased.

TOTAL OSTEOPATHIC MEDICAL SCHOOL ENROLLMENT BY GENDER

Academic Year	# of Males	%	# of Females	%	Total Enrolled
2004-05	6,410	51.2	6,115	48.8	12,525
2005-06	6,751	50.0	6,655	50.0	13,406

ETHNICITY OF OSTEOPATHIC MEDICAL STUDENTS

The diversity of osteopathic medical schools is not only represented in the female population. The American Association of Colleges of Osteopathic Medicine (AACOM) plays a critical role in encouraging all minorities to pursue a career in osteopathic medicine. The following graphs and table represent the declining percentage of White/Non-Hispanic osteopathic medical students and the increasing percentage of other ethnicities among enrolled osteopathic medical students.

OSTEOPATHIC MEDICAL SCHOOL ENROLLMENT PERCENTAGE ASIAN/PACIFIC ISLANDERS; BLACK/AFRICAN AMERICAN; HISPANIC/LATINO; NATIVE AMERICAN/ALASKA NATIVE

OSTEOPATHIC MEDICAL SCHOOL ENROLLMENT PERCENTAGE WHITE/NON-HISPANIC

TOTAL OSTEOPATHIC MEDICAL STUDENT ENROLLMENT BY RACE/ETHNICITY

Race/Ethnicity	2005-06	2006-07	2007-08	2008-2009	2009-10
Total White/Non-Hispanic	9,613	10,003	11,028	11,819	12,271
%	71.7	69.4	70.6	69.9	68.1

OSTEOPATHIC PHYSICIANS AND AMERICAN HEALTH CARE

OSTEOPATHIC PHYSICIAN OFFICE VISITS

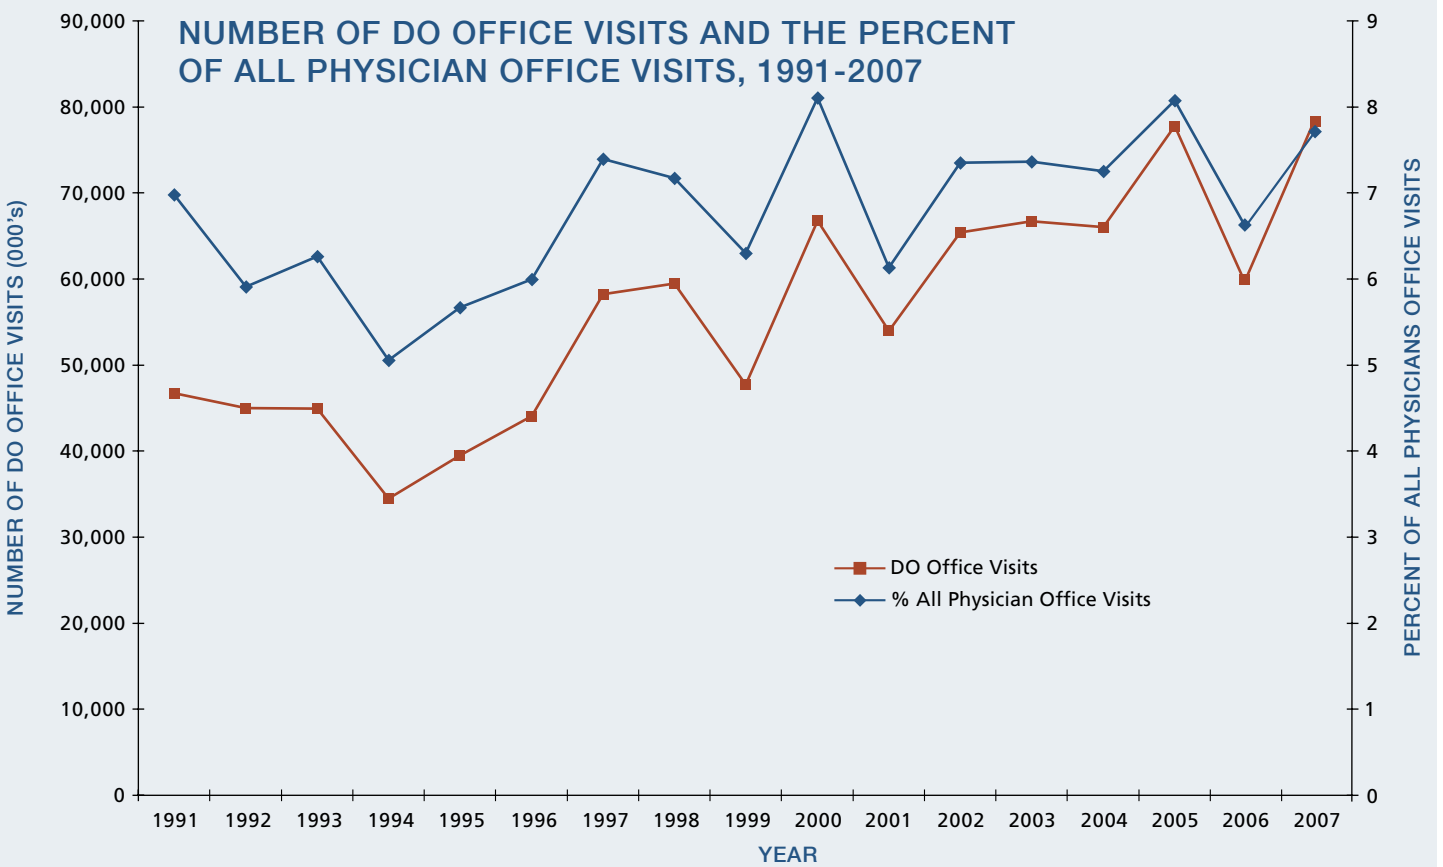

During the early 1900s, the AOA fought for recognition of the osteopathic medical profession by federal health programs. For example, in 1938 the AOA worked to amend the 1935 U.S. Employees' Compensation Commission, which defined a physician as an MD, to include DOs. Since then, the AOA has continued to advocate for the osteopathic medical profession. Today, DOs are an accepted part of American health care who have an increasing impact on the medical environment. The following table and graphs indicate the number of office visits osteopathic physicians reported between 1991 and 2007.

NUMBER OF OFFICE VISITS, 1991-2007 (in thousands)

Year	DO	MD	Total	% DO
2007	76,962	917,359	994,321	7.7
2006	59,722	842,232	901,954	6.6
2005	77,774	885,844	963,618	8.1
2004	66,029	844,828	910,857	7.3
2003	66,665	839,358	906,023	7.4
2002	65,385	824,595	889,980	7.4
2001	53,958	826,529	880,487	6.1
2000	66,729	756,813	823,542	8.1
1999	47,663	709,071	756,734	6.0
1998	59,464	769,816	829,280	7.2
1997	58,203	729,169	787,372	7.4
1996	44,030	690,463	734,493	6.0

OSTEOPATHIC PHYSICIAN SPECIALTIES

DO DISTRIBUTION AMONG MEDICAL SPECIALTIES

As fully-licensed physicians, DOs practice in all specialty areas of medicine. In 1984, more than half of all DOs specialized in family and general practice. That number has steadily declined over the last 26 years, while the number of those practicing in other specialty areas has grown.

SELF-IDENTIFIED DO PRACTICE SPECIALTIES, 1984-2010

Year	Family and general practice		General internal medicine		Pediatrics and adolescent medicine		Obstetrics		Osteopathic manipulative medicine (OMM) or osteopathic manipulative treatment (OMT) specialties*		Other specialty	
	DOs	%	DOs	%	DOs	%	DOs	%	DOs	%	DOs	%
2010	19,737	39.1	5,687	11.3	2,612	5.2	2,170	4.3	902	1.8	19,010	37.7

NOTES/SOURCES: The table includes only DOs in active practice and out of postdoctoral training. All DOs who graduated after Jan. 1, 2006, are assumed to be in an internship or residency. The AOA Masterfile and data licensed from the Association of American Medical Colleges were used to identify DOs in residency programs. "Pediatrics and adolescent medicine" include all specialties where the patient is a child or an adolescent and includes both general pediatricians and pediatric specialties. The categories "Family and general practice" and "General internal medicine" do not include family physicians, general practitioners and general internists who also practice secondary specialties. Those osteopathic physicians are counted under "Other Specialty." The category "OMT/OMM" includes family physicians who stress OMT in their practices in addition to osteopathic physicians who specialize in OMM. Board certifications were used when self-identified practice specialty was not available but this does not equate to the entire population of DOs.

OSTEOPATHIC BOARD CERTIFICATION

General certification is the primary certification awarded to DOs who meet the requirements in a specified field of medical practice under the jurisdiction of a certifying board. In 2009-10, three new certificates of added qualification were issued in Geriatric Medicine, Sleep Medicine, and Hospice and Palliative Medicine.

AS OF MAY 31, 2010 NUMBER OF AOA CERTIFYING BOARDS: 18

NUMBER OF DOs ACTIVELY BOARD CERTIFIED BY THE AOA

2005-06	2006-07	2007-08	2008-09	2009-10

THE AGE OF THE OSTEOPATHIC MEDICAL PROFESSION

AGE OF TOTAL PHYSICIAN POPULATION

As the American population ages, so do its health care providers. However, the following table indicates that the osteopathic medical profession is younger than the MD profession. In fact, over half of the osteopathic medical profession today is under the age of 45.

PERCENT DOs AND MDs BY AGE GROUP 2009

	Less Than Age 45	Greater Than Age 65
DO	51.5%	9.1%
MD	37.4%	20.3%

PERCENT DOs AND MDs OF ALL PHYSICIANS BY AGE GROUP 2009

	Less Than Age 45	Greater Than Age 65
DO	9.7%	3.2%
MD	90.3%	96.8%

SOURCE: DO data: AOA Masterfile, June 2010.

MD data: All MD statistics used with permission from the American Medical Association.
