HOW TO BE SUCCESSFUL UNDER MACRA

ASSESS YOUR EHR
Does it:
• Meet patient care needs?
• Achieve Stage 2 Meaningful Use?
Ask your vendor:
• When will 2015 CEHRT upgrades be available and at what cost?
• Will it include CPIA reporting?

CHECK YOUR MEDICARE FEEDBACK REPORTS AND PERFORMANCE
• Review your PQRS report and address any weaknesses.
• For the Quality and Resource Use Report (QRUR), consider the most common and costly patient conditions, and how you can provide more efficient, better coordinated care.

CHECK PROPOSED CPIA MENU
• Identify the items you do well.
• Implement any needed workflow changes and/or additions.

CONSULT WITH YOUR COLLEAGUES
• Decide if you want to report as a group or as individuals.
• Compare performance reports.
